Agricultural Overview

This bulletin covers 27 agricultural industries in the State of California. The number of industries ranges from 5 to 17 within each of the 6 geographic regions. The regions are the San Joaquin Valley, South Coast, Desert, Central Coast, Sacramento Valley, and North Coast (refer to map for details).

The data are organized into the following tables by state and region:

- Wage and Salary Workers
- Average Hourly Earnings

1

Summary

Employment

Total Agricultural Production and Services employment for May 2003 increased 37,300 jobs over the previous month, a gain of ten percent. The largest increase was seen in Agricultural Production, of 22,200 jobs. Farm Labor Contractor Services registered the largest increase for the month with a gain of 13,900 jobs. A significant increase was also seen in Berry crops, where 6,100 jobs were added. The largest decrease for the month was seen in the Production of Chicken Eggs category where 1,800 jobs were lost. It is normal for both Agricultural Production and Agricultural Services to show increases from April to May. In the breakdown of the regions, total agricultural employment increased 11.5 percent or 20,300 jobs in San Joaquin Valley. All other regions also showed increases.

Total Agricultural Average Hourly Earning increased to \$8.49 per hour in May, an increase of three cents from April 2003. Total Agricultural Services increased four cents and Total Agricultural Livestock Production increased three cents, while Agricultural Crop Production increased by one cent.

Production and Crop Activity

Harvesting proceeded in mature grain fields. Oats were harvested; straw was windrowed, baled, and stacked. Harvested oat fields were disced in preparation for the next crop. Fields of wheat, oats, and barley planted as forage were harvested for silage or cut and windrowed for drying. Alfalfa hay was cut, windrowed, dried and baled. Cotton planting resumed following weather-related delays, and was nearing completion in some areas. Cotton growers were fertilizing, cultivating, and irrigating the crop. Ground preparation and planting of rice fields continued, with weed treatments made as necessary. Weed problems in rice fields have been more pronounced than in previous years, due to the recent cool temperatures and rainfall. Cultivation and irrigation of sugar beet fields was underway, with disease control treatments made as necessary. Dry lima bean planting was underway. A few new cornfields were planted. Vegetable field activities such as thinning, weeding, irrigating, and treatments for insects and disease control continued. Cantaloupe, bell pepper, watermelon, honeydew, and freezer lima bean planting continued. Irrigation and weed control activity continued in processing tomato fields. Some tomato transplanting occurred. Harvesting of spring potatoes was ongoing. Onions harvested for fresh market sales were bagged and drying. Lettuce harvest continued in the San Joaquin Valley. Small leeks, red onions, squash, and sweet peas were picked in the Central Valley. Watermelon harvesting began in the Imperial Valley. The following vegetables were also harvested during the month of May: artichokes, asparagus, basil, bok choy, broccoli, cabbage, carrots, cauliflower, celery, cilantro, fava beans, green beans, green onions, mustard greens, parsley, radicchio, and spinach.

Damage to crops from earlier storms became more evident in apple, cherry, nectarine, peach, plum, and pluot orchards. Cultural activities in tree fruit orchards included irrigation, fruit thinning, and disease and pest control treatments. Growers cultivated, fertilized, and treated vineyards with fungicides and insecticides as necessary. Shoot thinning and sucker removal continued in some table grape vineyards. Stone fruit harvesting continued. Blueberries, cherries, nectarines, peaches, and apricots were picked and packed. Harvest of the Navel orange crop slowed, while Valencia orange harvest continued to gain momentum. Lemons were harvested in the Central Valley. Strawberry harvesting was in full swing due to the warmer weather. Apple growers applied treatments to control insect and disease problems. Irrigation and treatments to control diseases and insect pests were made in almond, walnut, pecan, and pistachio orchards. Walnuts were treated for codling moth and blight.

Cattle were shipped to market or to summer pastures. Most lambs have been shipped in Central and Southern California. Bees were moved to melon, alfalfa, and vegetable fields.

DATA NOTES

Data Sources:

These data are obtained from two sources: the Employment Development Department (EDD) Covered Employment and Wages (ES-202) data files and a monthly survey conducted by the California Agricultural Statistical Service (CASS) of the U.S. Department of Agriculture (USDA) and the Labor Market Information Division of EDD of 4,200 agricultural employers. The sample was selected to be representative of the State's agricultural employers by size, geographic location, and industry categories. Sample data are gathered for the survey week that includes the 12th calendar day of the month. All data in this bulletin represent activities taking place during this mid-month period. Same month prior year employment data are benchmarked to the ES-202 data files maintained by EDD.

Data Comments:

To aid in accurate usage and interpretation of the data, please note the following:

- Agricultural Services employment survey data may be recalculated; historical trend information is used to adjust sample data when low response rates occur.
- Regional data may show greater variability than statewide data because of small sample size and variable reporting patterns in specific industries.
- Current month regional estimates are based on the recorded addresses of owner-operators. Same month prior year regional data are based on worksite locations. Significant differences between regional current month and same month prior year data could result, although statewide totals might be comparable.
- Where data cannot be estimated because of inadequate sample reporting, the letters "na" have been entered into the field to indicate estimates are not available.
- Wage data include wages of supervisors and hired non-production workers (primarily administrative personnel). Piece rate data are also included where applicable.
- Fishing, forestry, and hunting industry data are not included in the Agricultural Services estimates. Unique seasonal industry patterns of employment make producing employment estimates for these industries problematic.
- Employment data do not include employers of unpaid family workers.
- Agricultural workers who are employed by farm labor contractors are reported in Agricultural Services under that
 industry category. Employment levels in Crop Production and Livestock Production do not reflect their activities in the
 associated industries that contract with the farm labor contractors.
 - Total agricultural employment and hourly earnings estimates in this bulletin are derived from the monthly Current Employment Statistics for Agriculture project. Estimates in this bulletin will differ from other agricultural estimates published by EDD and the USDA because of differences in the number of industries covered and in the definition of agricultural workers.

Subscriptions:

Annual subscriptions are available for \$30 per year. Ask for publication number LAU-15. To subscribe or for information, please call (916) 262-2162 or write to:

Employment Development Department Labor Market Information Division Publications Information Unit 7000 Franklin Blvd., Building 1100 Sacramento, CA 95823

The Agricultural Bulletin is also available on our Internet Web site at http://www.calmis.ca.gov.

The California State Employment Development Department (EDD) is a recipient of federal and state funds, is an equal opportunity employer/program, and is in compliance with Section 504 of the Rehabilitation Act and the Americans with Disabilities Act (ADA).
